

Nano Herbs® Light

Revolutionary Acupuncture Technology - Acupuncture Without Needles

Dr. Luke Cua, Ph.D, OMD, LAC

Nano Herbs® Light (NHL) is a revolutionary acupuncture technology that allows patients to achieve the results of acupuncture without the use of needles. NHL uses a combination of Traditional Chinese Medicines (Nano Herbs® and Nano Vita® Water) and state of the art technology (Nano Light System – a dual light system that includes BLUE and WHITE lights) to help improve the health and well-being of patients. Chinese Medicine holds the belief that an individual’s wellness is measured by whether organs meridian energy and DNA cell structure is in “balance”. Certain toxins, including radiation from electronics such as cell phones, computers, cell phone towers and free radicals can damage and cause imbalance of cellular DNA structures, which are the root of many poor health conditions, such as heart attacks, stroke and cancers. Nano Herbs® and Nano Vita® Water use nanotechnology to help heal damaged cells at the atomic/molecular level by restoring the DNA double-helix structure to a healthy, well-balanced state (See Figure 1). When combined with the use of Nano Light System, by (1) inserting Nano Herbs® that target the specific issue and Nano Vita® Water in a glass vials, (2) inserting the vials into the Nano Light System (See Figure 2), and (3) shining and administering the NHL onto acupuncture points and organs, rebalancing and enhancement of cells of acupuncture points and organs¹ are performed via herbal energies and light frequencies.

NHL can be used for over 700 physical conditions. The use of NHL is less invasive than traditional acupuncture since it does not involve the use of needles. Moreover, the use of herbal energies and light frequency may improve and heal physical conditions that are not treatable by traditional acupuncture. Finally, NHL is safe and can be operated by someone not trained in Traditional Chinese Medicine. Among others, the six main functions of NHL include: (1) cosmetic improvement, (2) scalp enhancement, (3) pain management, (4) Meridian-Organ rebalance, (5) rebalance of immune systems, and (6) energy support for cancer patients.

NHL is versatile and easy to use. A safe distance of 0.25" to 1.5" should be maintained between NHL and the treatment skin area. Each treatment session can last from 5 to 15 minutes and can be performed every one to three days. NHL can be used by practitioners who are not trained in Traditional Chinese Medicine but who would like to extend their capabilities to help their patients.
